

MAYUR PRAJAPATI

SENIOR SDET | QA AUTOMATION ENGINEER

M: 635 133 4389 | mayurprajapati1042@gmail.com | [linkedin.com/in/mayurengineer](https://www.linkedin.com/in/mayurengineer) | github.com/mayurprajapati | medium.com/@mayurengineer

IMPACT SNAPSHOT

- 7+** Years in QA & Test Automation
- 350+** Automation Bots Shipped
- 1,200+** Scripts Migrated off JUnit
- 1,200+** Jenkins Jobs on CI/CD
- 30%** Productivity Boost Delivered

AUTOMATION & QA TOOLS

Selenium, Playwright, Appium, WinAppDriver, Oracle OATS / KWiK

API TESTING

RestAssured, Postman, JSON Path, XPath

LANGUAGES & SCRIPTING

Java, Python, Groovy, Bash

CI / CD & VERSION CONTROL

Jenkins, GitLab CI/CD, Git, Jenkins Shared Libraries

AI-AUGMENTED TESTING

Agentic AI, LLM Integration, Prompt Engineering, GPT-driven test data generation

DATABASES

PostgreSQL, MongoDB, Firestore

OCR / VISION TESTING

Sikuli, AWS Textract, Tesseract, Gemini Vertex

METHODOLOGIES

Agile, Scrum, Sprint Planning, Test Strategy Design, Code Review

IDES & OTHER

Cursor AI, Google Antigravity, Eclipse, VS Code
FFmpeg, mRemoteNG, Websockets, Lombok, Apache POI, Guava, OpenCSV

PROFESSIONAL SUMMARY

Senior SDET with 7+ years architecting and scaling UI, API, desktop, and database automation frameworks that cut manual QA effort and accelerated release velocity. Deep hands-on expertise in Playwright, Selenium, RestAssured, and Appium, with a proven record of modernizing legacy automation (eliminated JUnit across 1,200+ scripts) and embedding AI/LLM-driven testing into CI/CD pipelines. Recognized by leadership for scaling automation coverage and delivering measurable efficiency gains across web, desktop, and OCR-based test surfaces.

PROFESSIONAL EXPERIENCE

Briq Data Analytics Pvt Ltd. | Apr 2021 – Present
Senior Software Engineer (Automation) / SDET II

- **Architected a Java-based automation framework** powering 350+ bots across Web (Selenium, Playwright), Desktop (Appium, WinAppDriver), API (RestAssured), and OCR/PDF (Sikuli, AWS Textract, Tesseract, Gemini Vertex) test surfaces.
- **Led a zero-downtime migration off JUnit** across 1,200+ automation scripts and built BriqBotRunner, a centralized test-execution engine using Java Reflection, cutting compile overhead and simplifying maintenance.
- **Scaled CI/CD test infrastructure** across 1,200+ Jenkins jobs with GitLab CI/CD and a custom Jenkins Shared Library for cross-platform (Unix/Windows) test execution.
- **Automated 3rd-party ERP test coverage** for Sage 300 and Procore using OCR-driven validation (Sikuli, AWS Textract) over RemoteApp sessions.
- **Designed custom LLM-based test agents** and integrated GPT into automation workflows to auto-generate machine-readable test inputs, expanding data-driven test coverage.
- **Engineered Briq WebDriver**, enabling secure remote test execution and debugging via WebSocket TCP tunneling, removing local tool installs and protecting client source code.
- **Built platform-independent test evidence capture** (video recording & live sharing via FFmpeg) for web and desktop automation, praised by clients for debugging traceability.
- **Owned test strategy** in partnership with developers, product managers, and SREs; reviewed peer merge requests and led knowledge-sharing sessions.
- **Recognized by the VP** for scaling automation workflows and driving measurable efficiency gains in artifact deployment.

Oracle, Gandhinagar | Jul 2019 – Apr 2021
Quality Assurance Analyst

- **Automated Oracle HCM product testing** using the OATS & KWiK frameworks in Java, developing and maintaining 200+ automation scripts.
- **Built the HCM Data Search Utility** end-to-end as full-stack developer, driving a 30% boost in automation team productivity.
- **Revamped the HCM Simple Report Generator**, reducing report load time and shipping new reporting features.
- **Triaged and resolved automation script defects** tracked in ALM, strengthening OATS-based test tooling reliability.
- **Extended the HCM KWiK recorder** with a new capability for faster, more reliable test script creation.
